****IMPORTANT NOTICE TO ATHLETE/GUARDIAN/COACH****

IFMA acknowledges that weight cutting by means of dehydration, loss of water and minerals from the body may pose a dangerous and life threatening result, even in amateur sports and young athletes. At IFMA we support weight control by fat loss, NOT BY water loss. We therefore urge all athletes, entourage and stakeholders to take responsibility in this process for the health of the athletes.

Doctors on duty at the daily medical check are authorised to perform on-the-spot urine spectrometer tests for dehydration on any athlete at any given time should symptoms of dehydration be suspected. Any athlete with a urine density above 1.030 shall not be permitted to compete.

DECLARATION OF WEIGHT RECORD // 4-WEEK LEAD UP TO COMPETITION
